Project Design Phase
Solution Architecture

Date	14/10/2026
Team ID	6ab4a90f0fc666a751b44650
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Solution Architecture:

The **Auto Ticket Classification** solution architecture establishes an automated, event-driven pipeline on the ServiceNow Cloud Platform. It eliminates manual triage by capturing incident requests, evaluating short descriptions against keyword matching logic in Flow Designer, updating database records with dependent category choices, and dispatching automated acknowledgment emails to the caller.
